

# Simulation of Sound Absorption Coefficient as per ISO 354

Computational model\* of absorption measurement in reverberation rooms

**Client** Kvadrat  
**Test Specimen** Curtains  
 Type: Flat

## Arrangement: Flat hanging

1 layer of textile, flat arrangement  
 Distance to the wall: 100 mm

Front textile: Arda from Febrik / kvadrat

## Simulated module build-up (from top to bottom):

2.27 mm	Front textile
100 mm	Air gap
	Concrete surface

## Simulation set up:

Flat arrangement, 100mm to the wall  
 No surrounding, enclosing frame  
 Simulation reproduces the standard ISO 354/11654 measurement - random incidence environment
