

Sabi

23% post-industrial recycled wool, 65% new wool,
12% nylon
19 colours
140 cm
Design: Louise Sigvardt

Abrasion 80.000 Martindale
Pilling (EN ISO) 5
Lightfastness (EN ISO) 5-7

10 year
warranty

Regular cleaning is important in order to keep the upholstery looking its best and to prolong its life.

Sabi

Why choose Sabi for your furniture?

Multidimensional woolen textile with dynamic depth

Sabi explores layers and bright colour paradigms. One of the coloured yarns for *Sabi* are made of virgin wool, while the other is recycled wool dyed in darker tones. This approach ensures the textile's dynamic colour palette, which features a classic dobby weave construction.

The recycled wool used to create *Sabi* comes from re-using scraps. It's the same raw material used for the *Re-wool* by Margrethe Odgaard. However, the composition and the colour expression of the two textiles are different.

Sabi blends contemporary colours with notes from the 1970s and 1980s, balancing sharp, powerful colours with pure, toned-down neutral tones.

Sabi is suitable for private and public spaces alike.

The advantages of wool

Wool is a natural and chemical-free material that we source responsibly from the UK, Norway, New Zealand and Australia. Our textiles feature wool from a specific breed of sheep known for their thick, high-quality wool.

By sourcing local wool from sheep farms near our UK and Norwegian mills, we enhance the diversity of our wool collection. We aim to increase the use of wool from local sheep farms, which not only reduces emissions but also improves traceability, transparency and animal welfare.

Wool fibre is naturally resistant to fire, which means it reduces the need for water and harmful synthetic chemicals to make it flame-resistant. Instead of dripping or melting, it chars if exposed to fire.

Wool is particularly adept at resisting dirt. Wool naturally repels water and with proper care, maintains a strong resistance to stains.

Wool is incredibly comfortable because it is soft and breathable. It is naturally insulating and absorbs moisture making it suitable for both cold and hot climates.

Woollen textiles are highly durable and have a remarkable ability to resist creasing. Our woollen textiles are very resistant to abrasion and offer high elasticity, making them versatile textiles that will age gracefully.
