

Test laboratory for the fire behavior of building materials, Dipl.-Ing. (FH) Andreas Hoch  
Testing, supervising and certifying body, authorized by the building supervision authority

# TEST REPORT

## PZ-Hoch-231386

for the proof of Fire behaviour according to DIN 4102, part 1

Translation of the German test report – no guarantee for translation of technical terms

<b>company</b>	<b>Kvadrat High Performance Textiles</b> Kiefte 18 NL-7151 HZ Eibergen
<b>description of samples</b>	yarn dyed fabric consistn of Polyester FR colour: black
<b>name of the material</b>	„Retta / KHPT Fabric 123”
<b>sampling</b>	by the company itself
<b>content of request</b>	Proof of flammability to classify building materials to class B1 “schwerentflammbar” according to DIN 4102, part 1
<b>validity of test report</b>	30.11.2028
<b>result</b>	<b>The examined product meets the requirements of class B1 for “schwerentflammbare” (hardly flammable) building materials according to DIN 4102, part 1 (May 1998) , suspended freely or with distance of &gt;40 mm to same or other plain materials.</b>

This test report includes 4 pages and 3 enclosures.

Remark: If the above mentioned building material is not used as product according to MBO § 2, Abs. 9, Ziffer1, there is no need for a general building supervisory test report.

This test report is not valid if the examined building material is used as product in the meaning of state building prescriptions (MBO § 17, Abs. 3).

This test report does not replace an eventually necessary proof of applicability concerning building supervisory or building laws in the meaning of state building prescriptions. This has to be verified by:

- “allgemeine bauaufsichtliche Zulassung” (general building inspectorate approval ) or by
- „allgemeines bauaufsichtliches Prüfzeugnis“ (general building inspectorate certificate) or by
- “Zustimmung im Einzelfall” (exceptional approval)

This test report can underlie building supervisory procedures

- for regular building products for the prescribed proofs of conformity
- for non regular building products for the needed proofs of applicability.

This test report must not be published and copied without preceding agreement of the test laboratory and if agreed, only during validity and unchanged concerning appearance and contents.

## 1. Description of test material in condition as delivered

**PN 37998:** “Retta / KHPT Fabric 123” colour: black  
-yarn dyed fabric consisting of Polyester FR-  
There is no difference between side A and side B.  
characteristic values determined by the test laboratory:  
area weight: about 258 g/m<sup>2</sup> thickness: about 0,42 mm

The testing laboratory is not provided with further details concerning composition of the tested building materials. Samples are deposited.

## 2. Preparation of samples

The samples were kept in climate chamber 23/50 until they reached constant weight.

## 3. Arrangement of samples mounting: freely suspended

#7075 flaming side A in warp direction  
#7076 flaming side B in weft direction

## 4. Date of test CW 46 in 2023

## 5. Results The test has been examined according to DIN 4102 (Mai 1998)

<sup>1)</sup> indication of times: from the begin of testing procedure

<sup>2)</sup> checked off if applicable

<sup>3)</sup> indication of carrier/foam layer separated in case of fire-proofing agents

<sup>4)</sup> very strong development of smoke

## 6. Explanations concerning the testing procedure

There were no additional tests proceeded because of the residual length of  $\geq$  than 45 cm.

## 7. Summary of results and additional establishments to Fire Behaviour

line no.	measurement	Result with the tested specimen					dimension
	test-no.	#7075	#7076	---	---	---	
	flamed direction flamed side	warp A	weft B	---	---	---	
1	residual length	67	71	---	---	---	cm
2	max. smoke temperature	111	113	---	---	---	°C
3	density of smoke - integral	1	1	--	--	--	%min
4	remarks: none						

According to DIN 4102, part 1, "schwerentflammbare" (hardly flammable) building materials must meet the requirements of class B2.

Pursuant to additional tests in the ignitability apparatus this can be determined (appendix 3).

## 8. Special remarks

- This report is only valid for the material as described under paragraph 1. In combination with other materials or with additional coatings or grounds etc. the burning behaviour may differ.
- This test report is not valid for the exposure to outdoor climate conditions.
- This test report is not valid, as soon as the fabric is used as a building product in the sense of the "Landesbauordnungen" (state building requirements, MBO § 17, par. 3).
- This test report is no substitute for a General Building Inspectorate Certificate.
- This test report is granted without prejudice to the rights of third parties, in particular private proprietary rights.
- For legal interests only the German original version is relevant.
- In General Building Inspectorates procedures this test report can be based for
  - regular building materials for the required proof of accordance
  - for not regular building materials for the required proof of applicability

## 9. Validity

This test report is valid until the mentioned date on page 1. The test report becomes invalid in case the standards on which the tests are based are changed.

Fladungen, 14.11.2023

clerk in charge:

(Dipl.-Ing.(FH) Jürgen Hammer)

Head of the test laboratory:

(Dipl.-Ing.(FH) Andreas Hoch)

**„Brandschacht“-test #7075**

**measurement**

**#7075, PN37998: KVADRAT, "Retta / KHPT Fabric 123", K**  
Max. flue temperature: 111°C, Smoke density integral: 1%min  
Residual length: 67 cm

„Brandschacht“-test #7076

measurement

#7076, PN37998: KVADRAT, "Retta / KHPT Fabric 123", S  
 Max. flue temperature: 113°C, Smoke density integral: 1%/min  
 Residual length: 71 cm

**Test for normal flammability  
classifying B2 according to DIN 4102**

1. Description of test material in condition as delivered look at page 2
2. Preparation of samples  
Out of the material there have been cut samples for the ignitability apparatus.  
The samples were kept in a climate 23/50 until they reached constant weight.
3. Arrangement of samples -freely suspended-  
Flaming in warp and weft direction / side A and side B
4. Date of test CW 43 in 2023
5. Results

K: warp / S: weft

6. Remarks and explanations to the testing procedure - none -
7. Opinion concerning the dropping of burning material  
The test for normal flammability shows no burning dripping material
