Unlit Blockout

Type: Roller blind textile

Composition: 100% polyester laminated FR blackout with aluminium backing

Solar reflection: 70%

Openness factor: 0%

Colours: 8

Width: 300cm

Unlit Blockout is a roller blind textile designed by Louise Sigvardt, distinguishing itself as a premium metallised blackout textile that seamlessly integrates functionality with elegance. Designed to enhance any interior, it offers extensive control over privacy, glare, and thermal comfort, making it an indispensable addition for spaces where a complete blackout solution is desired.

Key to the superior functionality of this blackout textile is an ultra-thin aluminium layer on the backside, which reflects sunlight to maintain cooler interiors during summer and insulates to retain warmth in winter. This innovation significantly reduces heating and cooling costs while lowering CO2 emissions, contributing to sustainability goals. The aluminium backside also creates a uniform façade appearance, making it ideal for both residential and commercial applications.

Unlit Blockout is engineered with a three-layer construction, where two thin textile layers enclose a central layer that completely blocks out light. This advanced lamination technique gives the roller blind a soft-brushed appearance, further enhancing its aesthetic appeal.

Developed with a focus on safety and environmental considerations, *Unlit Blockout* is PFAS-free* and flame-retardant, ensuring compliance with stringent safety standards – without compromising its light-blocking capabilities.

The versatile colour palette of *Unlit Blockout* enhances its applicability in various interior styles. Featuring sophisticated greys, deep night blue, and warm beige hues, it provides a range of colour tones that complement any design theme. Whether you want to create a serene atmosphere or make a bold statement, *Unlit Blockout* by Louise Sigvardt offers the perfect combination of style and functionality to elevate your project.

*Regrettably, PFAS are everywhere, with detectable levels even found in drinking water. Despite our commitment not to intentionally add them, due to their pervasiveness, traces of PFAS might still be detected. PFAS (Per- and polyfluoroalkyl substances) are a group of man-made chemicals commonly used in various industrial applications for their resistance to heat, water, and oil.

Louise Sigvardt

Louise Sigvardt is a co-founder of the acclaimed Bunn Studio, a Copenhagen-based design studio working across fashion, architecture, and design. In recent years, they have collaborated with the celebrated fashion brands Everlane and Marimekko, and the furniture house Radnor. Their work has been recognised with numerous awards and showcased in leading international magazines.

Louise's background as a textile designer is evident in Bunn's rich yet minimal approach to design where texture is always a key element. For Louise, design is an immersive experience that begins with a narrative, an emotion or a captivating visual. She cites the application of textiles as the motivation in her career; "I found out that I loved working with textiles, but what fascinates me even more, are all the different areas of application."

Kvadrat Shade

Kvadrat Shade offers an aesthetically outstanding, versatile roller blind solution, which leverages Kvadrat's leadership in textile and design innovation. Crafted with metallised fabrics and creative talents, this enables architects to complete any design theme and optimise visual, acoustic or thermal comfort – or a combination of all three. Reflecting a commitment to longevity, simplicity and premium quality materials, the Kvadrat Shade hardware is designed by the internationally-acclaimed Bouroullec Studio, while Kvadrat produces the textiles. Kvadrat Shade completes this offering with end-to-end expert support that includes the advantages of Kvadrat's global network.
