

Ginger 2
Anne Fabricius Møller

Ginger 2

Ginger 2 is a colour update of *Ginger*, an open-weave curtain that stands out for its natural expression. Designed by Anne Fabricius Møller, it comes in a refreshed palette of 12 colourways, ten of which are new.

Ginger is inspired by the smooth surface, cool hand and fine, characteristic structure of flax. Small densifications of yarns appear irregularly over its surface, expressing a certain colour particularly strongly. This adds an extra dimension to its soft and natural expression.

The colourways for *Ginger* are created with two contrasting uni-coloured yarns – one in the warp, the other in the weft. The inspiration for the colours comes from the subtle nuances and harmonic hues of spices.

The contrast between the yarns is stronger in the new colourways. These give *Ginger 2* a melange-like appearance when it is viewed from a distance.

Made from Trevira CS, *Ginger* is durable and flame-retardant. As a result, it is well-suited to the contract market. Thanks to its natural expression, it also works well in private homes.

Anne Fabricius Møller

Anne Fabricius Møller is a Danish textile designer known for the timeless simplicity of her textiles and her fine craftsmanship. A graduate of the Royal Danish Academy of Fine Arts, she finds inspiration in diverse places: her designs are often informed by mechanical processes, movement, tools, nature and Japanese design culture.

The work of Anne Fabricius Møller is represented at The Danish Museum of Art & Design and the Drud & Køppe Gallery, which are both in Copenhagen. She has received several awards and honorary grants, including the Biennale award and grants from the Danish State Art Foundation.
