Clara 2

Clara 2 is a colour update of *Clara*, a woollen upholstery fabric designed by Anne Birgitte Hansen. Fresh yet refined, it comes in 24 matching colourways, twelve of which are new.

Clara is available in twelve sets of reverse colourways. One version is unicoloured and interwoven with melange stitching, while the other is with unicolour stitching on a melange background.

The melange yarns add depth to the look of *Clara* and combine to vibrant effect with the unicolour yarns. The fabric, which changes appearance according to the position of the viewer, projects a strong sense of volume and richness.

The twelve new colourways add further bold tones, such as golden yellow and deep magenta, as well as more understated, earthy shades, like anthracite, to the palette. In doing so, they ensure that versatile *Clara* offers an even greater number of opportunities for mixing and matching.

While *Clara* is clearly suited for use in pairs, it also works very well with other melange and unicoloured textiles, thanks to its flexible design and colourways. It is suitable for both contract and private use.

Anne Birgitte Hansen

Acclaimed Danish textile designer Anne Birgitte Hansen wanted to be a weaver from an early age. She studied industrial design at Copenhagen's School of Arts, Crafts and Design.

After graduating Anne Birgitte Hansen began to develop unique items, in addition to industrial designs. By allowing these different areas of production to influence each other, she brings innovation to the classic Scandinavian weaving tradition.

Characterised by a simple, pure mode of expression, Anne Birgitte Hansen's output is wide-ranging. It spans simple vertical lines, organic motifs, woven upholstery and printed curtain textiles.
