Test Report

Material:

Sample of upholstery fabric collection in 18 colourways

designated Coda.

Fibre content: 90% wool / 10% polyamide (customer's information)

Sampling:

The test material was sent by the client and received at the Danish

Technological Institute 12 July 2004.

Method:

Colour fastness to artificial light, ISO 105-B02:1994, method 2.

Incl. AMD 1:1998 and AMD 2:2000

Normal conditions (1-8 scale, 8 best rating)

Test apparatus: Xenotest 450

Period:

The testing was completed 6 September 2004.

Results:

Results are given on page 2 of this report.

Terms:

The test has been performed according to the rear side conditions, which are according to the guidelines laid down by DANAK (The Danish Accreditation). The testing is only valid for the tested specimen.

The test report may only be extracted, if the laboratory has approved the extract.

7 September 2004, Danish Technological Institute, Textile
